企业智能体架构实践

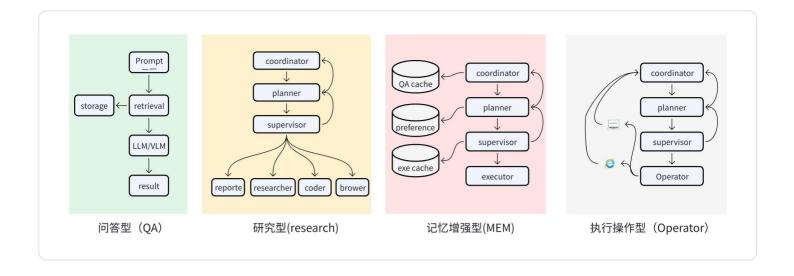

1. Overview

- 1. 企业级智能体和我们常说的Agent框架(Langchain, AutoGen, crewAl等)有什么关系?
- Agent框架是用来开发智能体的SDK;
- 2. 为什么一些明星智能体(openmanus, suna, tars 等)好像并没有使用这些框架,或者只使用他们的非常少的功能?
- 智能体本质是业务工程,需要针对业务的深度定制,企业智能体 = 企业SDK + 业务 + Agent框架
- 3. 企业智能的研发,有没有一些通用的思路和架构?
- 有一些规律,是根据业务形态的规律

2. 智能体核心组件

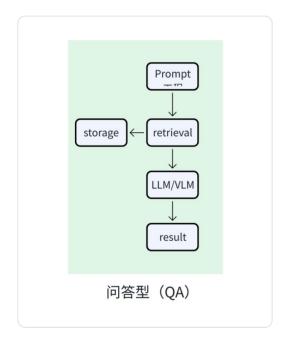

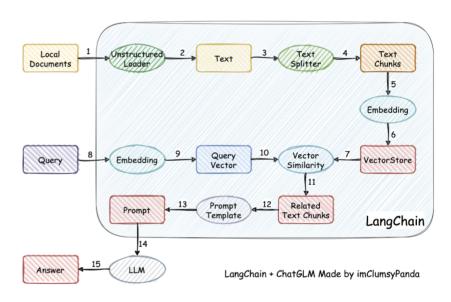

2.1 Agent架构类型

3. 常见智能体对应的架构

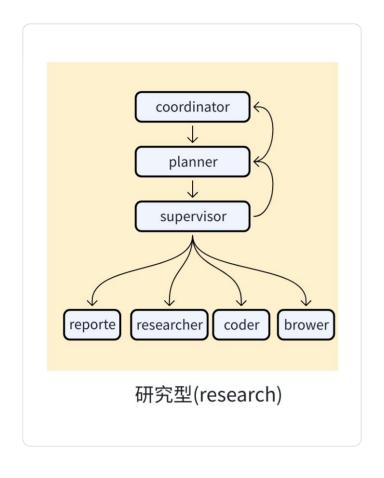

3.1 问答型(QA)

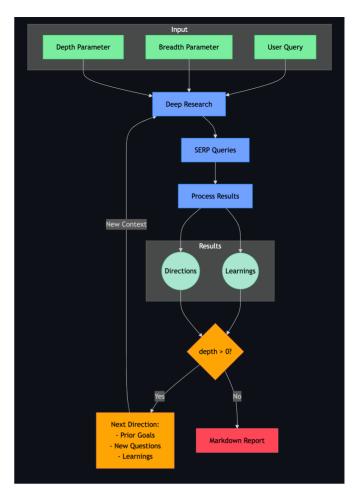

Langchain-chat

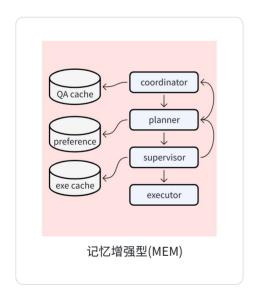

3.2 研究型(research/react)

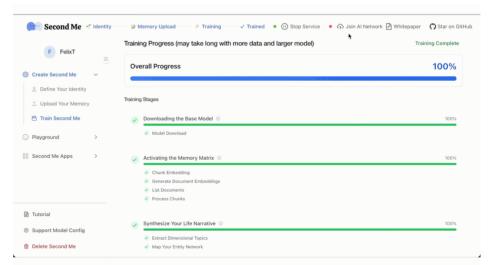

deep-research

3.3 记忆增强型(mem)

Second Me
